

Case Study

Security Assured Audio Visual Systems

OBJECTIVES

HS Infra were engaged to design, deliver and support new, bespoke Audio Visual systems for a number of classified MOD IT systems to display. The new systems had to achieve full MOD security accreditation and pass numerous cyber penetration tests before acceptance.

SOLUTIONS

Utilising specialist hardware, HS Infra's security cleared and accredited Project Managers designed the systems in line with all MOD security principles. Working closely with the MOD Security Accreditation team, our systems underwent numerous security tests and inspections to comply with the highly regulated parameters. Following successful security approvals, the systems were delivered the commissioned into operational service.

HS Infra delivered Train the Trainer packages for the client and provided annual support and maintenance services.

BENEFITS

The systems were fully tested, SCIDA approved, accredited, and successfully commissioned into operational service. Through constant and regular engagement with our sub-contractors and the project stakeholders, the HS Infra team delivered projects which exceeded our clients' requirements and delivered bespoke, secure Audio Visuals systems within budget, time and to their complete satisfaction; meeting the project aim and enhancing both the client's situational awareness and operational capability.

AT A GLANCE

- New state of the art Audio Visual system
- Design and installation
- Security Assurance
- Train the Trainer package
- Support and maintenance service
- Project duration 13 months
- Project value >£2M

"Many thanks for your work on on this project, it came down to the wire but I'm proud to see that we have got the project into a strong state, so long may it continue."
