

HS INFRA AND LEONARDO PARTNER TO RAPIDLY DELIVER SECURE FACILITY

HS Infra and Leonardo UK have completed a project to deliver a cyber-security facility equipped to handle secure data, in less than 12 months.

The project saw HS Infra successfully deliver a RIBA 0 – 7 Design and Fit Out for a specialist building for Leonardo UK. Adhering to the most stringent of security standards and compliance, HS Infra completed this project at speed, which progressed rapidly from initial concept design to fit out and delivery within a 12-month timeframe.

HS Infra's team of designers provided innovative solutions from architecture, mechanical, electrical, security and data with resilience, compliance, and efficiency as their core focus. Following an initial assessment study, Stages 1 to 4 of the RIBA Design were swiftly completed within a concise timeframe of just three and a half months, while securing all necessary major approvals.

Following the final design review, HS Infra seamlessly transitioned to site preparation, laying the ground works for the forthcoming construction phase. The construction and fit-out were completed within an action-packed eight-month period with all works being delivered to the highest quality and adhering to stringent security standards.

HS Infra's partnership with Leonardo UK on this infrastructure project marks a significant achievement, demonstrating the company's ability to deliver projects to the exacting standards demanded by Leonardo UK in dealing with highly sensitive customer data.

Steve Hutchinson, Founder and Director of HS Infra, said: "We are thrilled to have achieved such high levels of success within a remarkably short timeframe on this project for Leonardo UK. Managing projects from initial design to final contractor fit-out is a specialist area for us at HS Infra and we take a huge amount of pride in this undertaking. We rapidly developed an effective, transparent and trust-based partnership with Leonardo UK and this latest addition to our esteemed portfolio marks a significant milestone in our commitment to deliver secure infrastructure solutions and to exceed customer expectations."

The two companies are now looking at a range of further opportunities to collaborate in the design, build, and support of secure infrastructure for national and international security programmes.

About HS Infra:

HS Infra is a trusted leader in secure infrastructure, specialising in delivering innovative and robust solutions to public sector clients, working to protect people and valuable assets with precision, ensuring safety and security in a highly regulated global environment. Offering a comprehensive range of services designed to provide both physical and electronic protection, HS Infra's expertise extends across multiple sectors, focusing on safeguarding critical assets and sensitive information. Commitment to excellence ensures that highly secure solutions are delivered on time and within budget. More information www.hsinfra.co.uk Follow X/Twitter @hs_infra

About Leonardo:

Leonardo is one of the UK's leading aerospace companies and one of biggest suppliers of defence and security equipment to the UK Ministry of Defence. The company operates from 8 main sites across the country, employing around 8,500 highly skilled people. Globally, Leonardo is among the top ten world players in Aerospace, Defence and Security, with more than 53,000 employees and a significant industrial presence in Italy, the United Kingdom, Poland and the USA. In 2022 Leonardo recorded consolidated revenues of €14.7 billion and invested €2 billion in Research and Development. For more information visit uk.leonardo.com Follow X/Twitter @Leonardo_UK
