

Case Study

Structured Cabling Solutions for Deployed Assets

OBJECTIVES

The client requirement for this project was to update systems and infrastructure for radio network connectivity across sites in the UK and overseas. The project would be SCIDA compliant and JSP 604 leaflet 4800 compliant to ensure the works complied with UK and MOD legislation.

SOLUTIONS

This series of small and medium projects to upgrade fibre, copper and coax networks across all sites, included the building of transportable radio containers at a UK site to be shipped overseas and connected into the network.

Liaison and compliance for both the main contractor and other third party contractors on the programme with SCIDA approval. The team continued working and travelling in the UK and overseas during COVID lockdowns to successfully deliver defence critical projects.

BENEFITS

Working at various sites, this project was SCIDA approved, and delivered to the full satisfaction of the client.

AT A GLANCE

- UK and overseas sites
- Logistics management
- Structured cabling
- SCIDA and JSP compliance
- Key worker status during COVID lockdowns
- Project value >£500k
- Project duration 3 years

"I thoroughly enjoyed working on this project throughout the COVID pandemic. Everyone worked hard to ensure this project continued to progress whilst dealing with the changing overseas travel landscape."
