

HS INFRA

The Asset & Information Protection Specialists

THE COMPANY

HS Infra Limited offer professional TSCM (Technical Surveillance Counter-Measures) and security services for commercial businesses that do not have the necessary expertise and who need to find a quality vendor and trusted ally. By providing you with the loyalty of a business partner and the economics of an outside vendor, HS Infra Limited make sure that its customers have what they need to make measured decisions to maximise the safety of their employees, information and property.

OUR SERVICES

The core security services offered by HS Infra Limited are:

- Technical Surveillance Counter-Measures (TSCM):
 - The electronic sweep and physical search of identified areas for unauthorised electronic eavesdropping devices
 - An active TSCM Monitoring Service for important meetings
 - TSCM Threat Presentations & Briefings for all levels of the business
 - The acquisition and supply of TSCM equipment, 'Grab Bags' and delivery of Basic TSCM Search & Secure Courses
- Security Education & Awareness Training (SEAT); Our highly qualified security operatives can undertake tailor-made security presentations, briefings, courses, and programmes to company personnel, at all levels
- Security Reviews, Audits & Surveys
- Security Policies & Procedures

TSCM EQUIPMENT

Equipment mainly deployed in the electronic inspection:

- RF Near-Field Baseband survey 0 – 10 GHz (Analogue & Digital)
- Near-Field Survey for digital/burst transmitters (0 - 10 GHz)
- Checks in the ISM (Industry, Scientific & Medical) Band 2 – 4 GHz
- NLJD x-ray (of major supporting walls)
- Thermal Image Scan (walls, floors, and ceilings)
- Mains testing of both dirty (domestic usage) and clean (UPS/IT) power cables for mains form carrier devices
- Checks for photo-electronic covert cameras
- Wi-Fi and Bluetooth search and identification software program deployed
- Physical search equipment for Near-field RF, GSM and 2G, 3G, 4G and 5G detection 0– 10GHz)
- UV and CCTV optical checks (of walls and furniture)
- Physical search for covert devices: Internal – walls, ceiling spaces, floor spaces, furniture, IT equipment, wall furniture (pictures, clocks), whiteboards, door frames, mounted audio-visual equipment, telephones, blinds/curtains and ledges

OUR TEAM

Our personnel have an extraordinarily strong security background and come from a range of varied public and private sector backgrounds. The Sweep Teams are made up of former government and military personnel who have been cleared to work at the highest levels and in many diverse environments. To further extend and improve the quality and level of service that we provide the skills of a TSCM Security Artisan. With extensive building and security knowledge, their skills are invaluable at quickly and efficiently identifying any unusual indicators in the fabric of the building, that could indicate if unauthorised eavesdropping devices have been deployed.

TRAINING & EQUIPMENT

Our personnel receive continuous and ongoing training. This not only includes technical training in the form of toolbox talks, sweep exercises and specialist courses (both by in-house and external providers) but also customer focused training sessions. Equipment is maintained and upgraded to keep pace with the advances in the field of TSCM. HS Infra Ltd does not use or introduce the 'latest gadget' or piece of equipment into its armoury until it has been thoroughly road tested by the TSCM Teams for reliability, suitability, usability, and durability.
